Letter of recommendation for .....

Dear Colleague,

The University of Freiburg has launched a new DFG funded Research Training Group (RTG 2202) “Transport across and into membranes”. The student indicated above has applied for a PhD fellowship in this program and, in this context, has been asked to forward this letter to you to ask for a letter of recommendation.

We would be very grateful, if you could take the time and give us your frank opinion about the suitability of the candidate as a PhD student. Would you be so kind as to evaluate the applicant according to the following criteria:

- theoretical knowledge
- technical proficiency
- interaction with colleagues
- adaptability / flexibility
- motivation / commitment
- independence
- communication skills.

In addition, could you also give us your overall rating (upper 5, 10, 20, 30 or 40% of all students seen) and indicate the time period and your position (teacher, adviser, employer etc.) in which you interacted with the student. The letter of reference should be sent by e-mail or fax to the address indicated above.

Thank you in advance for help.

Yours sincerely,  
Prof. Dr. Thorsten Friedrich  
Spokesperson RTG 2202
